P-Booster

“Ready-to-use” solutions for solid and liquid phosphate fertilizers

In soils Phosphate is quickly precipitated as insoluble Calcium-, Iron- or Aluminum-phosphates after P-fertilization.

P-Booster shelters the Phosphate like a protective shield. Subsequently, applied Phosphate remains available for the plant, regardless of soil pH.

Simple application in a fertilizer mixing system (batch blender, continuous mixer or screw conveyer) or add directly to liquid fertilizers.

Content (% w/w)

40.0 P-Booster

Bulk density (kg/l): 1.30 / pH: 9.5

CE certified

P-Booster

Benefits

- ✓ Convenient liquid formulation for all common Phosphate fertilizers
- ✓ Reduced Phosphate precipitation by Ca, Fe or Al
- ✓ Increases Phosphate availability of organic fertilizers such as Slurry
- ✓ Fertilizer synergist for better uptake of macro and micronutrients
- ✓ For granulated, crystalline, and liquid Fertilizers such as DAP, MAP, 20-20, 13-40-13 and Slurry

Packaging: 20l / 200l/ 1000l
