

CroxX foliar

Si15

High Silicon formula with Potassium and Algae extract (*Ascophyllum nodosum*). Enhances crop stability and resistance against biotic and abiotic stress by strengthening cell walls. Si synergistically helps with K to regulate the plants water balance and is especially useful in hydroponics and soilless cultivation.

For foliar application

Content (% w/w)

15.0 SiO₃ / 10.0 K₂O

10.0 Algae extract

Bulk density (kg/l): 1.22 / pH: >11

Si15

Benefits

- ✓ Enriched with biostimulant for vitalization
- ✓ Improves plant vigor by high concentration of readily available Silicon
- ✓ Promotes plant health and resistance against biotic and abiotic stress

Packaging: 1l / 5l / 20l / 1000l
