CroxX Fertilization on the right track

CroxX

stabil 21

Worldwide established stabilized N-Fertilizer for N nutrition in fertigation systems.
The high NH_4 content ensures maximum efficiency of DMPP.
Ammonium Fertilization enhances root formation and reduces pH in the rhizosphere/root zone. This significantly improves the mobilization and uptake of Phosphorus and Micronutrients.

For Fertigation.

Content (% w/w)
21.0 N / 60.0 SO_3 (24 S)
0.8 DMPP (related to NH_4-N)

Bulk density (kg/l): 0.9 - 1.20 / **pH:** 3.5 - 5.0 / **Average granule size (mm):** 0.2 - 0.7
CE certified

stabil 21

Benefits

- ✔ 100% water soluble
- ✔ Favors ammonium nutrition
- ✔ Sulphur content (60% SO_3)

Packaging: 5kg / 25kg
